EDUCATION

International Institute of Information Technology, Hyderabad

B.Tech in Computer Science

Hyderabad, India

July 2024 – Present

RELEVANT COURSEWORK

Computer Science: Data Structures & Algorithms, Operating Systems & Networks, Algorithm Analysis & Design, Computer System Organization, Automata Theory, Databases and Applications, ML Security

Development: Introduction to Software Systems, Internet of Things, Design & Analysis of Software Systems

Mathematics: Linear Algebra, Real Analysis, Probability and Statistics, Discrete Structures

EXPERIENCE

S-Learn (Learning Management System) | *React, Supabase* | 

January 2026 – April 2026

Shankar Foundation

Hyderabad, India

- Led a 5-member team to gather requirements with Shankar Foundation to define 3 core user flows for a digital learning platform.
- Redesigned 70+ pages of static educational content into interactive, gamified web modules helping 100+ students.
- Deployed production-ready releases on Vercel and SPCRC servers (IIIT Hyderabad) with role-based access for teachers, parents, and admins.

PROJECTS

Splitco (Expense Manager) | *React, Node.js, MongoDB* | 

December 2025 – Present

- Built a 3-tier group expense splitting application that reduces settlement complexity using graph-based debt netting across transactions.
- Designed a responsive UI with real-time updates across 4 modules: groups, expenses, balances, and settlements.

Agri-Bhasha Toolkit | *Bhashini API, OCR* | Megathon 2025 | 

October 2025

- Collaborated with a 5-person team to engineer a multilingual agricultural assistant for 22 Indian languages.
- Shipped a 3-service deployment stack (frontend, backend, database) across Vercel and Render.

Docs++ (Distributed Document Editor) | *C++, TCP Sockets* | 

October 2025 – November 2025

- Built a collaborative document editor supporting 10+ concurrent users with sentence-level locking.
- Reduced metadata lookup latency to sub-1ms using LRU caching and Trie-based indexing.

UniGate (Campus Security Management) | *Supabase, WhatsApp Web.js* | 

January 2026

- Coordinated with campus authorities to develop a QR-based campus gate system with 3-role workflows (students, guards, admins) and leave tracking via IIIT CAS SSO.
- Integrated live approvals and automated delivery for overstay notifications.

IMS App | *Kotlin, Jetpack Compose* | 

April 2026

- Designed a role-based institute management Android application featuring dedicated dashboards for 2 distinct user roles (administrators and students).
- Engineered an attendance module optimized for streamlined marking, advanced filtering, and data exporting, paired with a drag-and-drop timetable featuring real-time scheduling constraints.

TECHNICAL SKILLS

Languages: C, C++, Python, HTML/CSS, JavaScript, TypeScript, SQL, Bash, x86-64 Assembly, Kotlin

Frameworks: React, Vite, Django, Flask, Node.js, Express.js

Tools & Platforms: Docker, Git, GitHub, Wireshark, Postman, LaTeX, Figma, MongoDB, MySQL, PostgreSQL

Libraries: NumPy, Pandas, Matplotlib

ACHIEVEMENTS

- Top 20 Finalist, Megathon 2025 (Agri-Bhasha Toolkit) – IIIT Hyderabad’s largest hackathon with 1000+ participants.
- Head of Marketing & Social Media Team, The Gaming Club – Handling social media of the largest club in IIIT H with over 1200+ followers.
- Member of the Cultural Council – Involved in planning and overseeing 20+ campus-wide events, coordinating with multiple clubs and teams to ensure smooth execution.
- JEE Mains 2024 - AIR 1139 (Top 0.1%) | JEE Advanced 2024 - AIR 4199 (Top 2%).
