EDUCATION

International Institute of Information Technology, Hyderabad

B.Tech in Computer Science

Hyderabad, India

July 2024 – Present

RELEVANT COURSEWORK

Computer Science: Data Structures & Algorithms, Operating Systems & Networks, Algorithm Analysis & Design, Computer System Organization, Automata Theory, Databases and Applications, ML Security

Development: Introduction to Software Systems, Internet of Things, Design & Analysis of Software Systems

Mathematics: Linear Algebra, Real Analysis, Probability and Statistics, Discrete Structures

EXPERIENCE

S-Learn (Learning Management System) |

January 2026 – April 2026

Shankar Foundation

Hyderabad, India

- Architected multi-tier deployment stack with role-based access control for 3 user roles: teachers, parents and admins.
- Engineered server-side rendering and client-side state management for 70+ interactive educational modules serving 100+ concurrent users.
- Configured production deployments on Vercel and SPCRC servers (IIIT Hyderabad) with database optimization, session management, and real-time content sync.

PROJECTS

Splitco (Expense Manager) |

December 2025 – Present

- Built a 3-tier group expense splitting application using React, Node.js, and MongoDB.
- Reduced settlement complexity to at most n-1 transactions across n debts using graph-based debt netting.
- Designed a responsive UI with real-time updates across 4 modules: groups, expenses, balances, and settlements.

Agri-Bhasha Toolkit | Megathon 2025 |

October 2025

- Collaborated with a 5-person team to engineer a multilingual agricultural assistant using Bhashini API with OCR-based extraction for 22 Indian languages.
- Shipped a 3-service deployment stack (frontend, backend, database) across Vercel and Render within a 24-hour hackathon window.

Docs++ (Distributed Document Editor) |

October 2025 – November 2025

- Built a collaborative document editor in C++ supporting 10+ concurrent users with sentence-level locking over raw TCP sockets, achieving zero edit-conflict data loss under load testing.
- Reduced metadata lookup latency to sub-1ms using LRU caching and Trie-based indexing.

UniGate (Campus Security Management) |

January 2026

- Coordinated with campus authorities to develop a QR-based campus gate system with 3-role workflows (students, guards, admins) and leave tracking via IIIT CAS SSO, replacing a manual paper log used by 2000+ residents.
- Integrated Supabase Realtime DB for live approvals and WhatsApp Web.js for automated delivery and overstay alerts.

Smart Glove |

February 2025 – April 2025

- Designed an IoT-based smart glove using IMU, Flex sensor, and ESP32 to support 5+ gesture-driven commands.
- Evaluated gesture-to-command mappings through iterative testing achieving 100% accuracy, providing accessibility for Smart Home/Device control.

TECHNICAL SKILLS

Languages: C, C++, Python, HTML/CSS, JavaScript, TypeScript, SQL, Bash, x86-64 Assembly

Frameworks: React, Vite, Flask, Node.js, Express.js

Tools & Platforms: Docker, Git, GitHub, Wireshark, Postman, LaTeX, Figma, MongoDB, MySQL

Libraries: NumPy, Pandas, Matplotlib

ACHIEVEMENTS

- Top 20 Finalist, Megathon 2025 (Agri-Bhasha Toolkit) – IIIT Hyderabad's largest hackathon with 1000+ participants.
- Marketing and Social Media Head, The Gaming Club (largest club at IIIT Hyderabad).
- Member of the Cultural Council – Involved in planning and overseeing 20+ campus-wide events, coordinating with multiple clubs and teams to ensure smooth execution.
- JEE Mains 2024 - AIR 1139 (Top 0.1%) | JEE Advanced 2024 - AIR 4199 (Top 2%).
