EDUCATION

International Institute of Information Technology, Hyderabad

B.Tech in Computer Science and Engineering

2023 – Present

CGPA: 8.78

EXPERIENCE

Undergraduate Researcher

CVIT, IIIT-H

May 2025 – Present

Hyderabad, India

- Collaborating with Prof. Jayanthi Sivaswamy on medical imaging and segmentation research.
- Developing a multi-modal image segmentation model using deep learning to improve anatomical structure delineation.

Software Development Intern | GitHub

Eklavya Foundation

Jan 2025 – May 2025

Remote / Hyderabad, India

- Developed a Smart Asset Management System using MERN stack to manage organizational assets, projects and users.
- Enhanced the system with real-time form validation, database export facility and automated asset report generation.

PROJECTS

Distributed Network File System (NFS) | GitHub - C, Threads, TCP Networking

- Designed scalable distributed NFS architecture with dedicated naming server, storage servers, and clients over TCP.
- Implemented concurrent file operations with multi-threading, synchronization primitives, and fault-tolerant data replication.
- Enhanced path resolution performance by leveraging trie and hash map; added support for audio file streaming.

Crowd Detection App | GitHub - Kotlin, OpenCV, TFLite, Android, QIDK

- Created an Android app for real-time crowd and emotion detection leveraging QIDK kits computing power.
- Incorporated multiple crowd detection models to optimize battery usage on QIDK kits.
- Trained an emotion detection model and merged it with the crowd detection model for real-time analysis.

LoRAQ | GitHub - Python, Reinforcement Learning, NumPy

- Built an RL-based framework for low-rank matrix approximation, reducing computation time while maintaining accuracy.
- Applied DQN, A2C, and hybrid methods to accelerate approximation by up to 50% on GPUs.
- Incorporated adaptive strategies and early stopping to reduce training time by over 30% with minimal error increase.

CShell | GitHub - C, Unix, Shell Design

- Built a modular Unix-like shell in C with job control, signals, I/O redirection, pipelines and robust process management.
- Implemented 10+ commands along with history, aliases, error handling and foreground/background process control.

ACHIEVEMENTS & EXTRACURRICULARS

- | | |
|--|-------------------------|
| • Merit List Award: Recipient for three semesters at IIIT-H. | <i>2023–2025</i> |
| • ICPC India Prelims: Secured team rank of 129 out of 2930 teams which participated. | <i>2025 Ranklist</i> |
| • Codeforces: Rated Specialist with Max Rating of 1556. | <i>nidhissssssssssh</i> |
| • JEE Mains: Secured All India Rank 1256 (99.899 percentile) among 1.2 million candidates. | <i>2023</i> |
| • JEE Advanced: Achieved All India Rank 2698 among 150,000 candidates. | <i>2023</i> |
| • KVPY-SA: Secured All India Rank 1250, Merit List Holder. | <i>2022</i> |
| • NTSE Scholar: Qualified both stages (State and National) of the National Talent Search Examination. | <i>2021</i> |

TECHNICAL SKILLS

Languages: Python, C, C++, JavaScript, HTML/CSS, SQL

Technologies/Frameworks: Linux, Git, React, Express, MongoDB, Node.js, Flask, NumPy, Pandas, OpenCV, PyTorch

RELEVANT COURSEWORK

Computer Science: Data Structures & Algorithms, Operating Systems & Networks, Algorithm Analysis & Design, Computer System Organization, Automata Theory, Databases and Applications, Machine Learning, Statistical Methods in AI

Development: Introduction to Software Systems, Internet of Things, Design & Analysis of Software Systems

Mathematics: Linear Algebra, Real Analysis, Probability and Statistics, Discrete Structures, Numerical Algorithms
